AnswerIQ

The intelligence layer your data has been waiting for.

Instantly surface critical answers and recommendations, powered by Liongard's rich, near-time data and embedded AI. From configuration clarity to compliance readiness, AnswerIQ makes it easy to understand what's happening, why, and what to do next.

What It Delivers

AI Asset Insights

- Generates smart summaries on every asset in your environment.
- Surfaces security risks, misconfigurations, and anomalies automatically.
- Delivers CIS and NIST-aligned recommendations to harden systems and close compliance gaps.

AI Search Insights – Coming Soon

- Creates AI-generated summaries in response to your search queries.
- Pulls contextual insights from Liongard data to deliver quick, clear answers.
- Helps you understand relationships, risks, and root causes faster.

Ask Roar – Coming Soon

- Natural language assistant trained on your environment's Liongard data.
- Answers multi-step, cross-system questions, like "Which privileged users don't have MFA?"
- Turns Liongard into an intelligent analyst that anyone on your team can use.

> "
> Liongard saved us countless hours that would have been spent on manual data collection and auditing, allowing us to focus more on proactive solutions rather than firefighting. Simply put, Liongard helps us deliver better service with less chaos.

Developer

About Liongard

Liongard is redefining Attack Surface Management with an intelligent, AI-powered platform built for modern IT and security operations. Trusted by MSPs, MSSPs, and IT providers to protect over 70,000 end customers, Liongard delivers unified visibility across users, systems, networks, and cloud environments. With over 85 integrations, Liongard empowers teams to uncover hidden risks, enforce cybersecurity posture, and automate the actions that matter most. By combining deep asset intelligence with real-time insight and scalable remediation, Liongard fuels cyber resilience, operational efficiency, and sustainable growth.

liongard

Why It Matters

Accelerates decision-making
Delivers answers in seconds, no scripting required.

Empowers non-technical roles
Everyone from techs to account managers can access deep insight.

Enhances compliance readiness
Surfaces gaps and guidance that align with industry frameworks.

Reduces manual digging
Less time spent searching. More time acting.

Ideal Use Cases

Compliance Reporting

Generate evidence and recommendations aligned to CIS/NIST.

Security Triage

Deliver consistent, proactive security insights that build trust and demonstrate value over time.

QBR Preparation

Pull detailed context and asset-level insights to enrich client conversations.

Onboarding & Audits

Quickly assess environments, identify misconfigurations, and align posture.
