

RemediatelQ

Fix what matters, fast.

RemediatelQ helps MSPs take action with confidence. From misconfigurations to weak posture, it empowers your team to enforce controls at scale and secure client environments faster with guided, automated remediation.

What It Delivers

Automated Microsoft 365 Remediation

Take action on misconfigurations right within Liongard, no switching platforms. Built-in fixes target high-impact security gaps.

Hardening Capabilities

Deploy standard security policies across environments. Enforce posture with confidence using predefined remediation paths.

"Visibility is power—knowing when something changes can mean the difference between security and disaster. Liongard gives us that edge."

Matthew Woehrle
IT Systems Administrator
Flagship Networks

Security Gaps Addressed

Mailbox Forwarding Rules

Detect and neutralize suspicious internal or external forwarding rules to stop exfiltration.

Conditional Access Gaps

Automatically apply missing policies and detect silent removals that weaken security.

Password Hygiene Enforcement

Surface accounts with weak password policies and take corrective action.

About Liongard

Liongard is redefining Attack Surface Management with an intelligent, AI-powered platform built for modern IT and security operations. Trusted by MSPs, MSSPs, and IT providers to protect over 70,000 end customers, Liongard delivers unified visibility across users, systems, networks, and cloud environments. With over 85 integrations, Liongard empowers teams to uncover hidden risks, enforce cybersecurity posture, and automate the actions that matter most. By combining deep asset intelligence with real-time insight and scalable remediation, Liongard fuels cyber resilience, operational efficiency, and sustainable growth.

Inactive but Licensed Accounts

Identify and clean up stale or disabled licensed accounts to cut risk and waste.

Privileged Account Oversight

Identify over-licensed or exposed privileged users and enforce proper controls.

Risk-Based Remediation (High/Medium)

Respond to Microsoft-flagged risk levels with guided hardening steps.

Security Gaps Addressed

Compliance Reporting

Generate evidence and recommendations aligned to CIS/NIST.

Security Triage

Deliver consistent, proactive security insights that build trust and demonstrate value over time.

QBR Preparation

Pull detailed context and asset-level insights to enrich client conversations.
