

WHY THIS PLATFORM CHANGES EVERYTHING.

From Reactive to Proactive:
What's the Real Cost of Manual IT Oversight?

Managing IT environments manually or with semi-automated tools leads to significant time waste and risk. Here's a breakdown of the costs with a customer with 1,000 devices.

Manual Reviews

1000 devices
x 90 minutes per device

1,500 hours per month
\$75,000 in labor

NOT SCALABLE

Semi-Automated Review with Scripting

1000 devices
x 20 minutes per device

300 hours per month
\$1,500 in labor

MANUALLY HEAVY

LiongardIQ

1000 devices
x 2 minutes per device

33 hours per month

FULLY AUTOMATED

Save over
450 to 1,470
HOURS A MONTH
with **LiongardIQ**

At just \$50 per hour,
this translates to
\$1,000 - \$6,000/mo.
in reclaimed value
every single month.

*A "review" refers to the time spent
validating system configurations,
policies, or assets.*

- ▶ Free up engineering time for **strategic work**
- ▶ Deliver QBRs + compliance reports **in minutes**
- ▶ Proactively **reduce cyber insurance risk**
- ▶ Drive **smarter** client conversations
- ▶ Show **measurable** monthly ROI

The Lion Never Sleeps.

Discover Risk. Enforce Controls. Automate Outcomes.

1. Asset Discovery & Inventory

Every asset. Fully visible.

Continuous discovery of identities, devices, endpoints, and networks, powered by unified inventory and real-time identity updates.

- ▶ Enables cyber asset visibility, onboarding, audits, and billing accuracy.

4. Remediation & Hardening

Fix fast. Stay secure.

In-platform remediation and hardening automation for Microsoft 365 helping enhance security posture, best practices, and CAASM readiness at scale.

- ▶ Reduces manual effort and standardizes security.

7. Visual Insights

Insight you can see. Value you can share.

Deliver custom NOC-ready visuals and client-ready intelligence, turning operational data into smart, scalable visualization.

- ▶ Elevates QBRs, storytelling, and decision-making.

2. AI Asset Insights

Smart summaries. Actionable intelligence.

Automatically generate a clear, contextual summaries of each asset with CIS and NIST aligned insight-driven recommendations.

- ▶ Enables smart configuration management through AI-Generated asset intelligence.

5. AI Search Insights

Find it fast. Act even faster.

Get instant, AI-generated summaries based on your Liongard search queries. Surface context-rich explanations for systems, identities, or misconfigurations without digging through raw data.

- ▶ Speeds up triage and improves clarity without needing to interpret raw data.

8. AI Query Companion

Prompt. Generate. Refine.

Turn prompts into suggested Liongard queries. AI gives you a head start on custom metrics, helping you save time and uncover insights faster, with full control to refine and perfect results.

- ▶ Accelerates custom reporting with AI-assisted query generation, no need to start from scratch.

3. Real-Time Alerts

Instant alerts. Continuous defense.

Know the moment change happens. Surface live events from Microsoft 365 with network intelligence and instant alerts, keeping your asset inventory and posture up-to-date in real time.

- ▶ Reduces risk and response time through automation.

6. Ask Roar

Ask complex questions. Get clear answers.

Use AI to ask natural language questions across your environment, pulling insights directly from your data and supporting multi-layered queries in real time.

- ▶ Empowers teams to make fast, data-backed decisions with no query writing required.

▶ Ready to turn Intelligence into Impact?

See how LiongardIQ drives operational efficiency, improves security posture, and boosts profitability through automation and intelligence.
